# Gravy desk lamp

Gravy is a unique desk lamp that brings style and warmth to your space. Edge lit technology in a circular LED head provides a soft, evenly distributed glow of light. The solid wood bar and base are offered in two different natural woods: white oak and walnut. A slim but sturdy aluminum stand supports the wood bar and LED head. Controlling the light is easy: simply tap the center of the underside of the LED head to turn on or off, and touch and hold to adjust the light's brightness. Gravy is highly adjustable, providing the user with perfect light placement. This elegant combination of wood, aluminum and diffused light works beautifully to illuminate any interior.

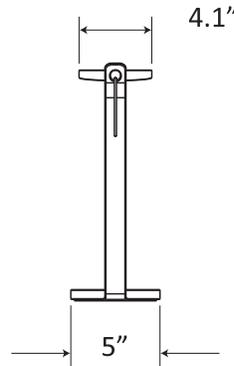

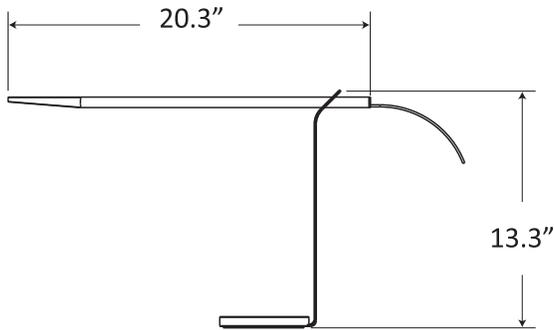

Lumens:	375
Energy Consumption:	5.5 W
Rated Lifespan	50,000 hours
Color Temperature:	Warm: 3,500 K
Color Rendering Index (CRI):	90
Dimmer:	Built-in touch sensor
Brightness Adjustability:	Continuous dimming
Standard Finishes:	White Oak/Matte White, Walnut/Matte White
Material:	Aluminum, plastic
Cord:	Blue (with White Oak/Matte White lamp), Red (with Walnut/Matte White lamp)

C-UL-US Certified

White Oak / Matte White; Blue cord

Walnut / Matte White; Red cord

**Potential LEED Points**

**Integrative Process (Possible 2 points)**

To support high-performance, cost-effective project outcomes through an early analysis of the interrelationships among systems. Konzept's LED desktop and task lighting provides finer control over lighting levels in occupied spaces. With personal lighting in place, elimination or downsizing of building lighting systems is possible.

**Interior Lighting (Possible 2 points)**

To promote occupants' productivity, comfort and well-being by providing high-quality lighting. All Konzept's task lighting products provide more than three lighting levels that are easily adjustable by occupants to suit their needs. Furthermore, all Konzept's task lighting products use high quality LED light sources with CRI over 80 and L70 rated lifespan over 50,000 hours. Desktop and task personal lighting also provides the opportunity to reduce overhead lighting.

Light source placed at 12.75" away from worksurface
