Charging Mat

The charging mat offers a fast and convenient solution for recharging Guy lanterns, making it ideal for commercial and public settings such as restaurants, hotels, event venues, and more. With the ability to charge up to six Guy lanterns simultaneously, it ensures uninterrupted illumination for busy environments. Designed with efficiency in mind, the charging mat is powered by USB-C, providing a reliable and modern power connection. Its ultra-slim profile, measuring only 0.3 inches thick, allows it to seamlessly blend into any space without adding clutter. The sleek and lightweight design makes it easy to install, store, or transport, delivering both style and practicality for professional settings.
