

Essence

Designers
Kenneth Ng, Edmund Ng

Essence combines lightweight aluminum and nylon-reinforced plastic components for strength and durability. An ergonomically positioned touch control at the tip of the lamp head provides convenient on/off operation and continuous dimming from 15% to 100%. Both the lamp head and slim body offer 360° rotation, allowing precise and flexible light positioning. Carefully arranged LEDs, secondary optics, and a diffuser work together to deliver soft, even illumination with gentle shadows. The detachable LED head allows easy replacement, enhancing field serviceability and extending the product's useful life. Multiple mounting options and project-specific customization make Essence a versatile lighting solution for a wide range of applications.

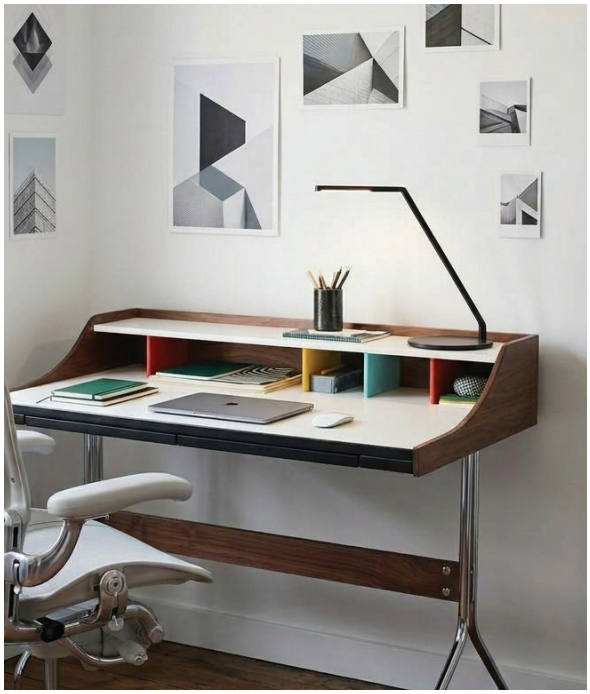

Lumens:	250
Energy Consumption:	3 W
Rated Lifespan:	60,000 hours
Color Temperature:	3,500 K
Color Rendering Index (CRI) :	83
Brightness Adjustability:	Built-in touch sensor
Material:	Aluminum, zinc alloy, plastic
Warranty:	5 years
Voltage:	120V
Standard Finish:	Metallic Black, Silver, White

Customizations available upon request. Contact sales@koncept.com.

Potential LEED Points

Integrative Process *(Possible 2 points)*
To support high-performance, cost-effective project outcomes through an early analysis of the interrelationships among systems.
Koncept’s LED desktop and task lighting provides finer control over lighting levels in occupied spaces. With personal lighting in place, elimination or downsizing of building lighting systems is possible.

Interior Lighting *(Possible 2 points)*
To promote occupants’ productivity, comfort and well-being by providing high-quality lighting.
All Koncept’s task lighting products provide more than three lighting levels that are easily adjustable by occupants to suit their needs. Furthermore, all Koncept’s task lighting products use high quality LED light sources with CRI over 80 and L70 rated lifespan over 50,000 hours. Desktop and task personal lighting also provides the opportunity to reduce overhead lighting.

Photometrics: Light source placed 15” away from work surface
