f

USB port

Optional USB Charging Base
Connect lamp cable and base cable to the splitter cord. Then connect the other end of the splitter cord to the power supply cable. Plug in power supply to the wall outlet. The USB port on the base charges any smart devices.

4b*

Pinch
f
g

Optional USB Charging Base
Using the provided cord clips, bundle the two cords together by pinching the cords into the cord clips.

5

Slide along the touchstrip to power on/off and adjust brightness

Dimmer
Brighter
Touchstrip
Touch button

Touch the center of the lens to change from Soft (2700K) to Cool (5000K) light. Touch and hold to cycle between two light colors

6

Occupancy sensor

Built-in occupancy sensor shuts off the lamp when motion is not detected for more than 15 minutes, and returns the lamp to its original setting upon detection of motion

7

Off ⟷ On
Occupancy sensor switch

A toggle switch on the back side of the lamp head can be used to turn off the occupancy sensor. The side with the magnifying wave symbol signifies ON, the opposite side is OFF
